

# Australian Lining Company Pty Ltd

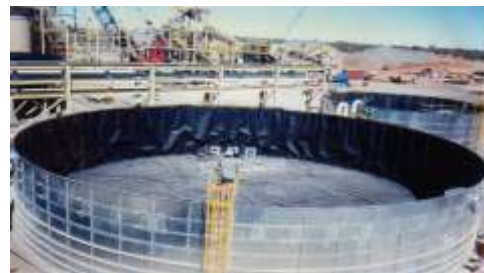

FOUNDING MEMBER OF THE IAGI  
(INTERNATIONAL ASSOCIATION OF GEOSYNTHETIC INSTALLERS)

## TANK LINER & SECONDARY CONTAINMENT APPLICATIONS

*Professional, competent, experienced and highly trained geomembrane installation company capable of installing flexible linings to a variety of different applications and with varying degrees of complexity.*

ALC specialises in the supply and installation of HDPE (High Density Polyethylene), Polypropylene and Ethylene liners for Primary Containment in various tank applications to prevent leaks and protection against deterioration or corrosion of both concrete or steel tanks from potentially environmentally harmful products. Liners are also placed under the tanks or in the dyked area for Secondary Containment. The liner is installed to the bunded area and ring beam wall around the tank to provide a low permeability, high chemical resistance flexible barrier to ensure against accidental chemical spills.

*Protecting the environment and providing containment since 1980*
