

# AQUACULTURE APPLICATIONS

*Professional, competent, experienced and highly trained geomembrane installation company capable of installing flexible linings to a variety of different applications and with varying degrees of complexity.*

ALC specialises in the supply and installation of HDPE (High Density Polyethylene) liners for ponds, tanks raceways for the aquaculture industry. Farming can be greatly improved by the use of highly impermeable, durable polyethylene geomembrane lining systems providing benefits for **SECURE WATER CONTAINMENT**

**ENHANCED WATER QUALITY CONTROL  
CONTROL DISSOLVED OXYGEN LEVELS  
EROSION CONTROL  
IMPROVED WORKING ENVIRONMENTS  
LOW MAINTENANCE COST  
EASY WASTE REMOVAL  
REDUCTION OF DISEASE RISK  
HIGH QUANTITY PRODUCT HARVESTING**

The need for positive water containment in the aquaculture industry has grown rapidly during the last several years. Public awareness of the ecological impact of aquaculture effluent's, the concern for preventing ground water contamination, the practice of water conservation and the control of disease causing organisms are just a few of the reasons for positive water containment.

*Protecting the environment and providing containment since 1980*
