RESERVOIR AND DAM APPLICATIONS

Professional, competent, experienced and highly trained geomembrane installation company capable of installing flexible linings to a variety of different applications and with varying degrees of complexity.

As clean water becomes more scarce and expensive to acquire, it is essential for us to look after and conserve this important natural commodity. ALC specialises in the supply and installation of HDPE (High Density Polyethylene) liners to ponds, dams and reservoirs for the containment of potable drinking water, stock water or irrigation water. The geomembrane liner provides a strong, secure, impermeable containment for water, also preventing seepage loss and contamination.

Protecting the environment and providing containment since 1980

- A FOUNDING MEMBER OF IAGI (INTERNATIONAL ASSOCIATION OF GEOSYNTHETIC INSTALLERS)
- SISTER COMPANY TO BEEHIVE VINYL PRODUCTS
